SECONDHAND CLOTHING

Put in the special bins in the town

Dear citizens,

thanks to your care the separate collection in our city has reached 55%.

An important result but not yet enough to guarantee to Ginosa the title of "Comune Riciclone."

To make a further footstep we want to improve for first the service bringing some changes to the calendar of separate collection.

From May 2nd 2016, in fact, it will be possible to confer the undiversified one only on Monday and no more on Friday.

Decreasing from 2 to 1 time a week separate collection will allow to increase the quality of the materials differentiated by starting to recovery and in the meantime to reduce the waste to dispose in dump.

The wastes have a great value, that's why we ask to all of you to believe in separate collection and to keep on collaborating with great care and availability.

Administration will guarantee the maximum dedication for a more punctual and efficient service.

We remind you all:

**"Years pass and separate collection is growing up.
welcome new separate collection calendar."**
